DETAILED ACTION

1. This action is in response to Applicant's application, filed on December 19, 2001 have been considered but are deemed moot because of Restrictions Request below.

Election/Restrictions

2. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even through the requirement be traversed (37 CFR 1.143). Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-5, 18, 22-27, 40 and 44-49, drawn to a method and system means for editing data stored, replicating data to produce core data, and producing shadow data store of a portion of the core data, which is data reproducing with data backup, classified in class 707, subclass 204.
- II. Claims 6-17, 19-21, 28-39, 41-43 and 50-63, drawn to a method and system means for generating user views for presentation to users, form the shadow data and core data store, by combining content of the shadow data with content of the core data to produce temporary image as user views, which is displaying or presenting data, classified in class 715, subclass 526.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instance case, invention I can be used for editing data stored, replicating data to produce core data, and producing shadow data store of a portion of the core data, which is data reproducing with data backup. Invention II can be used for generating user views for presentation to users, form the shadow data and core data store, by combining content of the shadow data with content of the core data to produce temporary image as user views, which is displaying or presenting data. See MPEP 806.05(d).

4. Because these inventions are distinct for reasons given above and have acquired separate status in the art as shown their different classification, restriction for examination purpose as indicated is proper.

5. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II each other, restriction for examination purposes as indicated is proper.

6. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

7. Applicants are advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8. Applicants is reminded that upon the cancellation of claims to be non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48 (b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48 (b) and by the fee required under 37 CFR 1.17 (i).
